

Set the Mood, Room by Room

The HAI Music Gateway provides storage and full visual control of your audio collection, complete with metadata and album art display. With Hi-Fi 2 by HAI, share your music throughout your home. HAI's audio system can be controlled by in-wall Touchscreen or wirelessly via remote control or mobile device for convenience.

HAI's unique Remote Input Modules let you easily plug into sources you already own. No audio rack or expensive proprietary components are required. You can even use your mobile device's Bluetooth connectivity to instantly connect and play music without plugging into a jack or cradle.

Control all A/V sources and the rest of your home from an Apple device.

View album art and song titles with artist names for all your music.

Remote Input Modules let you easily add the audio sources you already own, including wireless Bluetooth streaming.

With iPhone or Android apps, simultaneously adjust lighting and set room temperature for the perfect theater experience.

Complete Home Theater Control

Make movie night a real event for the entire family. Because additional automated features can be integrated for complete environmental control, the presentation is perfectly set every time.

Use one button on a Touchscreen to close the curtains or shades, lower a screen, and turn on the appropriate A/V equipment. Even automatically adjust the lights and set the room temperature for a genuine theater experience.

HAI provides automation solutions that make it easier than ever to tie all your A/V equipment together for remote control from an iPhone or iPad.
